

Air Raid

Hello, my name's Barbara Nixon, and I was an air raid warden during World War 2. It was my job to keep people living in Britain safe during an attack by enemy aircraft. I raised the alarm so that people could get to somewhere safe, like this air raid shelter.

Why was an Anderson shelter so safe? Use your torches and magnifying glasses to investigate the way it is made.

What would you take with you if you had to spend the night in an Anderson shelter? Pick one of the objects in the bag.

How would you make your food rations last the week? Which food would you miss the most?
