

Finding your way

Hello, my name's **Captain Dick Sutton**. I got my nickname, 'the admiral' because I once got so confused when trying to explain where I was during a training mission in North Devon that I gave a map grid reference that suggested I was in the middle of the Bristol Channel!

Where is my field gun? See if you can do better than me at finding your way and use the orienteering cards to help you find it. You only have three minutes so you had better set the timer!

The gun can fire 8 shells per minute. **How** many shells can it fire in 150 seconds?

The gun has a range of 12,000 metres. **Where** might it be able to hit from its current location? Use the map of the area to find out.
